

## What does your ingredient innovation pipeline look like?

Consumers' demand for healthy, natural, sustainable and authentic products is driving the next wave of food and beverage innovation and is contributing to a significant evolution in how companies develop their products and manage their supply chains.

Fi North America, co-located with SupplySide West, offers a one-stop opportunity for discovering ingredients and solutions, sourcing from leading suppliers around the world, gaining insight into market opportunities, and ensuring compliance with regulatory requirements and consumer expectations.
